

# U. S. EXPANDING RADIO TRAFFIC TO COVER GLOBE

Cable Interests Also Being  
Broadened to Reach Re-  
motest Corners.

By Universal Service.  
American cable and radio interests are expanding their services inter-nationally as rapidly as develop-ments in other countries permit, ac-cording to a statement by P. E. Nagle, communications expert of the Department of Commerce. He said:  
"The result of steady growth in traffic has been to keep up the in-terest in plans for new cables and new radio stations, and every Ameri-can communication company is now actively engaged in the construction of additional facilities and in plans for new routes and methods for the improvement of operation condi-tions."

"In the field of radio telegraphy the provision of American facilities for communication with foreign countries is dependent to a large extent on the erection of the cor-responding stations abroad, and since, with the possible exception of Latin America, radio telegraphy is a government monopoly in foreign countries, or at least a monopoly of domestic enterprise, the develop-ment of the art in foreign countries and the provision of the requisite funds is a preliminary to any progress in the United States."

Mr. Nagle reported that the power stations being built jointly by the United States, Great Britain, France and Germany at Buenos Aires and Rio de Janeiro will be completed, the former this year, and the latter within two years. He said that con-solidation and co-ordination of radio systems along the Atlantic coast is progressing steadily.

Amateur radiography is not wide-ly practiced in Germany because the country's economic condition makes a radio instrument a prohibitive luxury, except for scientists and technical experts paid by the govern-ment.

# Ham Prices Are Down

Ham—Boiled, Baked (Hot or Cold), Broiled or Fried—is one of the most appetizing and savory foods that the market offers.

The wholesale price of ham is fifteen to twenty per cent lower than it was six weeks ago.

The U. S. Dept. of Agriculture in an announcement dated June 19, 1922, in refer-ring to vitamins found in meat said, "Var-ious cuts of meat were tried, and in every instance pork was found to be relatively rich in vitamins. Pork tenderloin, fresh ham, smoked ham, and pressed boiled ham were tested and the results were much the same with all of them."

Swift's Premium Hams are always of a uniform high standard of quality, regard-less of price. A special cure of sugar and salt, and smoking over hardwood fires impart a flavor that has made "Premium" Ham the world's standard.

Summer time is ham time. Insist on having "Swift's Premium"—see the blue identification tag.
